Semi permanent system with smart installation

Climat Screen Fix

The Climat Screen Fix system is a good solution to block sunlight coming from small, high window frames where it is difficult to control them.

And for a situation where there is a permanent high level of sunlight coming into the room. The Climat Screen Fix system is applicable on all situations where it is not possible to install a roll-up system. For cleaning purposes the system is easy to remove.

Transparency

There are three types of light transmission:

- OR: dim-out (77 mu thick)
- 2R (77 mu thick)
- 10R: most transparent (77 mu thick)

Type and colours

All types are available in eight types of foils.

- bronze-silver (2R and 10R)
- grey-silver (2R and 10R, also in B1-quality)
- silver-silver (2R and 10R)
- white-silver (OR)
- black-silver (OR)

Frame

The frame is available in various colors

- 'Technical silver' anodised or enamelled in RAL 9001 or 9003 (standard option)
- In any desired RAL colour (surcharge)

Climat Screen Fix

Stabilization

By applying horizontal folds in the foil, it achieves a higher stiffness. The subtle folds ensure stabilization and a beautiful, calm-looking pattern. The foil is also equipped with a special hammering finish (prisms). The folds can be applied in the following dimensions:

- 25 mm
- 40 mm
- 60 mm

Detachabel system

The foil is installed within a frame with side channels and a top and bottom bar.

It is easy to install and to remove (for cleaning purposes).

When cleaning the window
you can easily remove the
system and place it later
back again.
