

**NEW!**

Does not let light through

Invisible joints

Resistant to humidity

Simple cutting

Paint with the wall

Easy installation

## PELMET PROFILE FOREST LIGHTBLOCKER®

### CONCEAL WITH STYLE: INNOVATIVE EASY-MOUNT PELMETS

While showcasing a curtain track is often a design choice we acknowledge the importance of concealment, especially for light-blocking. That's why we now offer sophisticated, easy-to-mount pelmets. The pelmets are nicely finished because of invisible joints. They are resistant to humidity and can be painted to harmonise with your wall. Assembly is easily customisable by cutting; it's a perfect blend of functionality and aesthetics. Installing the pelmet profiles is a breeze with the use of universal adhesive. Additionally, incorporating LED strips through a specially designed groove is possible, creating an enchanting atmosphere.
