

Experience the convenience of smart curtains

Give your curtains a unique flow with Forest and enjoy the comfort of motorised curtain track systems. Your curtains hang beautifully and move smoothly, while you operate them effortlessly from your chair.

Dutch pride, valued worldwide

Behind the motorised curtain systems is Forest Group, an internationally renowned family business from Deventer in the Netherlands. The high-quality tracks decorate not only homes, but also prestigious hotels. With over 30 years of experience, Forest offers unparalleled comfort and ease of use.

WHY CHOOSE SMART WINDOW COVERINGS?

LONGER LIFESPAN AND ENERGY SAVINGS

Smart window coverings extend the lifespan of your curtains because you no longer have to operate them manually. Furthermore, motorised curtains help save energy by automatically closing when the sun is shining. This keeps the heat out and the indoors pleasantly cool, without extra effort.

MORE PRIVACY AND SECURITY

By means of Routines, motorised curtain tracks ensure that your curtains are always closed at the right time. This keeps out unwanted looks and creates a safe and secure feeling in your home.

SMART SECURITY WHILE ON HOLIDAY

With motorised window coverings, you can easily pre-programme the opening and closing of your curtains. This is not only useful for everyday convenience, but also ideal when you are on holiday. Because your curtains move regularly, your home appears to be occupied, keeping unwanted guests at bay and reducing the risk of burglary. This means you can leave home with peace of mind.

FOREST BRINGS TOGETHER CONVENIENCE, COMFORT AND STYLE

YOUR MORNING ROUTINE CAN BECOME MUCH EASIER AND MORE COMFORTABLE WITH SMART WINDOW COVERINGS.

The motorised Forest curtain track systems allow your curtains to move smoothly and silently with the option for full automation. In addition, you have a wide choice of different systems, so you can always find the perfect solution for your window.

Discover the systems

THE RANGE

From curtain tracks and rail rods to recessed tracks and blinds – our selection of motorised systems offers a suitable solution for every room.

With the combination of top quality, whisper-quiet operation and durable materials, you are choosing not only style but also convenience. The curtain motor is placed behind the curtain, keeping it completely out of sight.

Whether you choose smart window coverings to enhance the look of your home or extra functionality, Forest always offers a luxurious and practical addition to your interior.

Shuttle®

THE POWER OF A RELIABLE MOTOR

EASY TO SET UP

The Shuttle curtain motor is easy to use. For instance, the curtain motor automatically determines the curtain package during onboarding. This can be adjusted manually if necessary.

EASY TO OPERATE

The systems are easy to operate with a Forest RF remote control, the Forest Connect App, voice control or integration with your home automation system.

FREE RUNNING IN THE EVENT OF POWER FAILURE

The Forest Shuttle® has a free-running function, so you can still open and close the curtains by hand.

TOUCH CONTROL

A simple tug on the curtain is enough to make it move.

ULTRA QUIET

The Forest motors and curtain systems together form an unbeatable combination. Thanks to the smooth running of the curtain systems and the ultra-quiet motor (<40 dB), the sound of the moving curtains is almost unnoticeable.

10-YEAR WARRANTY

Forest gives a 10-year warranty on the Shuttle motors, which is unique in the market. The battery of the battery-operated variant of the Shuttle has a warranty of 2 years.

CURTAIN WEIGHT

Standard Shuttle – up to 40 kg curtain weight
Strong Shuttle – up to 70 kg curtain weight
Shuttle battery – up to 25 kg curtain weight

“

A RELIABLE MOTOR MAKES THE DIFFERENCE BETWEEN A CURTAIN THAT MOVES AND A CURTAIN THAT OFFERS COMFORT AND CONVENIENCE.

Compact – FMS®

COMPACT AND BENDABLE. THE STANDARD FOR YEARS.

Recommended style
Standard pleat

The FMS® system is the most compact smart curtain track and therefore fits into any room. What makes this track truly unique is its bendability. Thanks to its flexible properties, it can be perfectly bent to even the most challenging window shapes, such as bay windows or round façades.

This compact and bendable curtain track system has set the standard in smart curtain rails for years due to its high reliability.

- Motorised compact track system
- Always silent and smooth operation
- Curves possible
- Length up to 12 metres possible (7 metres in one piece)
- The FMS® track works with all Forest Shuttle® curtain motors, including the battery-powered motor
- 10-year warranty on the track system

COLOUR OPTIONS

Recommended style
Wave pleat

Design – DS-XL®

A STYLISHLY DESIGNED CURTAIN TRACK.

Give your elegant curtains the finishing touch they deserve with this stylish, sophisticated design track.

The DS-XL® design track combines functionality with a refined design. Thanks to its sleek finish and exclusive look, the DS-XL® adds a subtle yet luxurious accent to your window coverings. The perfect base for stylish curtains.

- Motorised design track system
- Always silent and smooth operation
- Elegant design
- Ceiling mounting without visible supports for a sleek, modern look
- Only available straight
- Length up to 12 metres possible (6 metres in one piece)
- The DS-XL® curtain track works with all Forest Shuttle® curtain motors, including the battery-powered motor
- 10-year warranty on the track system

Design with light – DS-XL® LED

THE INTEGRATED LED LIGHTING CREATES
AMBIENCE IN ANY INTERIOR.

With the DS-XL® LED system, a design track with LED lighting, you create a versatile environment where you can set the mood in the room as you desire.

The integrated LED lighting creates a subtle, atmospheric glow in any room, while the curtains open and close smoothly and silently. Available with one or two LED strips, it provides a contemporary and practical accent for any interior.

- Motorised design track system with LED lighting (choice of 1 or 2 LED strips)
- LED lighting is dimmable
- Ceiling and wall mounting
- Designed for wave pleat
- Only available straight
- Length up to 12 metres possible (6 metres in one piece)
- The DS-XL® LED curtain track works with all Forest Shuttle® motors, except the battery-powered motor
- 10-year warranty on the track system. 2-year warranty on LED lighting

Recessed – FMS® Plus Recess

THE IDEAL TRACK TO CONCEAL IN THE CEILING.

Hide your curtain rails with the FMS® Plus Recess track for a sleek finish.

Don't want visible curtain rails? With the FMS® Plus Recess track, you can neatly store the rails in the ceiling for a sleek, modern look. Instead of traditional wall or ceiling mounting, this track is plastered directly into the ceiling. This also prevents bothersome cracks of light at the top of the curtain.

This solution is ideal for a renovation or new build, because this makes the mounting process easier. For complete invisibility, you can even install the curtain motor in the ceiling, so that all technology remains completely out of sight.

- Motorised recess track system
- Always silent and smooth operation
- Curves possible
- Works with all Shuttle® curtain motors, including battery motor
- Length up to 12 metres possible (7 metres in one piece)
- 10-year warranty on the track system

COLOUR OPTIONS

white

matt black

Blackout – FMS® Dual

ALWAYS ENJOY A GOOD NIGHT'S SLEEP.

Recommended style
Standard pleat

Optimise your sleeping environment with our special curtain track system, designed to prevent troublesome light. Thanks to the perfect closure, disturbing light gaps are a thing of the past, so you can sleep unimpeded.

In addition, the whisper-quiet operation ensures that the curtains move smoothly and silently. You can operate them effortlessly from bed with the push of a button, for ultimate comfort and a truly relaxing start and end to your day.

- Motorised two-track rail system
- Provides a perfect overlap of the curtains
- Ceiling mounting
- Only available straight
- Length up to 14 metres possible (7 metres in one piece)
- The FMS DUAL® curtain track works with all Shuttle® curtain motors (including battery-powered)
- 10-year warranty on the track system

CONTROL OPTIONS

The motorised systems are easy to operate remotely. Use a remote control, your smartphone, or voice commands via Siri, Google, or Alexa. Integration with home automation or smart hubs is also possible, offering even more possibilities. There are plenty of ways to control your smart curtains, so you always have optimal convenience and control.

REMOTE CONTROL

Control your curtain track effortlessly from any corner of the room with our handy remote control, for ultimate convenience and comfort. The EasyTouch remote control enables you to operate up to 6 curtains individually or simultaneously. Thanks to its stylish, compact design and matt finish, this remote is not only comfortable to hold, but also adds a contemporary touch to your interior. Available in two colours: matt white and matt black.

WALL SWITCH

Give your interior a stylish upgrade with our wireless wall switch. Control your curtain track effortlessly and without cables. The Forest wall switch allows you to control up to two curtains individually. Available in two timeless colours: white and black.

APP CONTROL

Control your curtains easily with a simple swipe via the Forest Connect App. Our user-friendly app makes it possible to open and close your curtains effortlessly, wherever you are. Enjoy ultimate flexibility and convenience, perfectly matched to your daily routine.

VOICE CONTROL

Make your voice heard with Google, Alexa, or Siri. With simple voice commands, you have full control over your system. Our systems can also be effortlessly integrated into these smart platforms, so you can experience even more convenience and flexibility in your smart home. Has the sun just started shining in while you're binge-watching your favourite show? With a simple voice command, you can close the curtain in seconds. From the comfort of your sofa or armchair, it couldn't be easier.

HOME AUTOMATION

Are you a fan of smart homes and ready to connect all your favourite devices centrally? Your new Forest system integrates seamlessly with the most popular home automation systems for the ultimate smart living experience.

SMART HOME HUB

Do you want to control all your smart devices from one app, without major renovations or modifications to cables? Then a smart home hub is the ideal solution. Popular providers of smart home hubs include Homey and Fibaro. The Forest systems integrate seamlessly with these, so you can enjoy optimal convenience and a fully connected smart home experience.
