## Give a **modern** and **special folding design** to your curtains.

INTRODUCTION

THE FOREST EASYFOLD SYSTEM® IS AN ADDITIONAL FEATURE OF THE DRAPERY HARDWARE SYSTEMS OF FOREST GROUP. IT COMPLIES FULLY WITH THE CONTEMPORARY DEMAND FOR ROUND AND FLUENT SHAPES IN DECORATIVE INTERIORS.

IT OFFERS NEW POSSIBILITIES FOR APPLICATIONS IN LARGE AND HIGH SPACES, SUCH AS LOBBIES, ENTREES, RECEPTION AREAS, CONFERENCE ROOMS, AUDITORIUMS, MEETING ROOMS, FOOD AND BEVERAGE OUTLETS ETC.

THE SYSTEM CAN BE INSTALLED ONTO ALL FOREST MANUAL, CORDED AND MOTORIZED TRACKS AND CURTAIN ROD SYSTEMS AND GIVES A MODERN AND SPECIAL FOLDING DESIGN TO THE CURTAIN.

SUCH A MODERN CURTAIN HEADING SYSTEM COMBINED WITH A SUITABLE FABRIC IS GUARANTEED TO BE A REAL EYE-CATCHER IN EVERY ROOM.
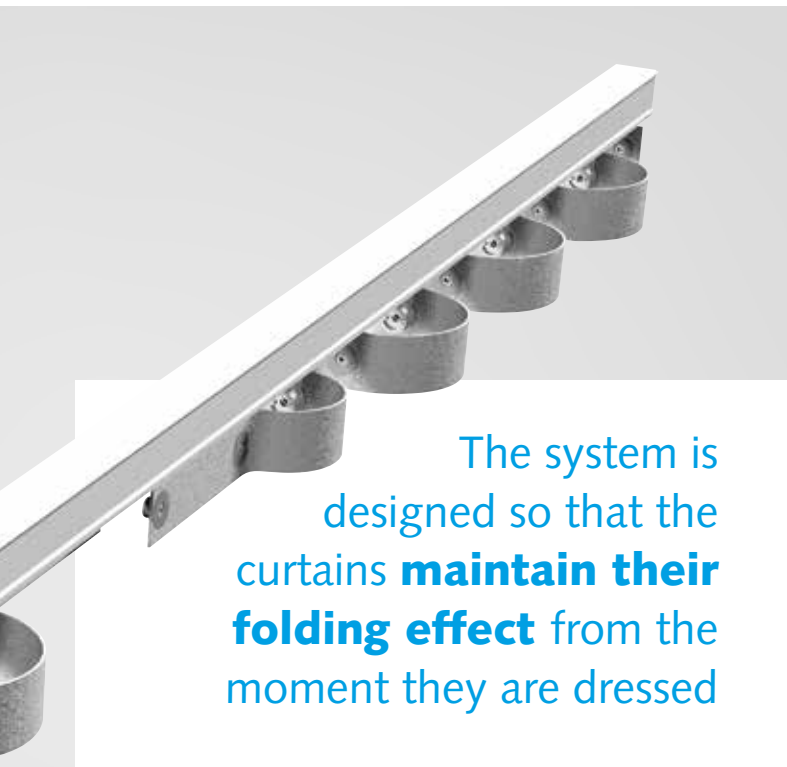

The system is designed so that the curtains **maintain their folding effect** from the moment they are dressed

WHAT MAKES THE FOREST EASYFOLD SYSTEM SO UNIQUE?

» The smooth folding effect is always maintained whether the curtains are open or closed.

» The system is designed so that the curtains maintain their folding effect from the moment they are dressed.

» The simple, yet stylish design makes the curtains easier to make up.

» The Easyfold heading stacks back neatly, taking up less space than traditional pleated headings.

» The glider-cord is not visible when the curtain is fully closed.

» Easy to take down and re-hang thanks to its detachable carrier-base.

» Depending on the fullness selected the Easyfold system can be more economical than more traditional curtains. (up to 33% compared to a regular pencil pleat curtain)

» Can also be used in horizontally-curved tracks. Examples of how Forest tracks can be bent in different situations:

HOW DOES THE FOREST EASYFOLD SYSTEM WORK?

» The system is available in two types; **Easysnap with metal snaps** already fixed on the heading tape at a fixed distance, in combination with double sided Easysnap carriers; **Easyflex with pockets on the heading tape**, allowing for a flexible positioning of the hooks, in combination with Easyflex carriers.

» Specially designed interconnected-gliders are contained within the curtain track.

» This connection cord limits the extension of the curtain fabric, creating a smooth and continuous folding effect. When opened, the system enables the curtains to stack back neatly and straight.

» Depending on the fabric type, a regular iron-on hem tape can be used with the Easyfold Tape at the top of the curtain to maintain a smooth appearance.

» Transparent Easyflex tape with pockets allows for completely variable folds and any fullness desired, from 150% to 350%!

» Easysnap Tape available in: white, black and transparent, in 10 cm and 15 cm spacing. Fullness options 180%, 200%, 270% and 300%.

» Both Easysnap and Easyflex can be applied on most Forest curtain track systems.

EASYFOLD CARRIER AND TAPE REQUIREMENTS

Easysnap .... cm

Easyflex .... cm

Easywave .... cm
60% = 8,0 cm carrier distance
80% = 6,0 cm carrier distance
100% = 5,4 cm carrier distance

Wave depth 10,75 cm or 15,75 cm with Easysnap tape and carriers. Ceiling space required 10,75 cm or 15,75.

Wave depth fully variable with Easyflex tape and carriers. Ceiling space required is equal to the spacing between the hook placement in the Easyflex tape.

WORKROOM INSTRUCTIONS

Forest Group understands that many workrooms will have their own method of manufacturing curtains. This guide is intended to give you a suggested make up method so you get the best from the Forest Group Easyfold system. When using your own fabrics we suggest that sample curtains are made to determine whether;

1. It is suitable for use with Easyfold, and,
2. If so, which size of Fold is most appropriate.
3. How many Easyfold carriers are exactly required to make up a particular size track.

In general, stiffer fabrics tend not to lend themselves well to Easyfold since they struggle to hold the soft curves for the drop of the curtain.

Once you have confirmed your fabric is suitable you may want to consider using lead weight tape and curtain side weights for an improved finished appearance. The maximum weight that the standard Easysnap and Easyflex tape can carry is 10 kg per meter of track. However, individual track weight restrictions still apply. Easysnap Roller and Easyflex Roller have much higher weight limitations, consult the catalogue to see individual system weight graphs. This guide is based on using the recommended Easyfold component parts detailed on the next page.
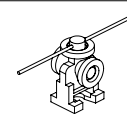

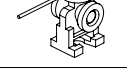

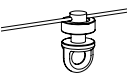

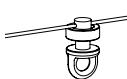

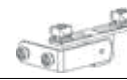

FOREST EASYFLEX SYSTEM
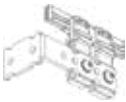

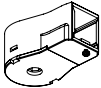

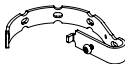

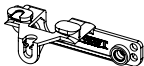

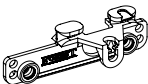

The Easyflex system works with a 7,7 cm high transparent tape with pockets, one roll of 100 meters has two lines of pockets on the top and the bottom of the tape. In the pockets you can fit the Easyflex hooks, which are the lower part of the Easyflex carriers. The carriers are available in 60% (8,0 cm), 80% (6,0 cm) and 100 % (5,4 cm) width. Easyflex endhooks are used to connect the curtain to the master carriers. The base of the first master carrier can be fixed onto the master carrier, to make sure the master carrier takes the curtain along with it.

FOREST EASYSNAP SYSTEM

The Easysnap system works with a range of snap tapes, in white, black or transparent versions. The stainless steel snaps are placed at fixed distances in the tape, with a distance from center to center of 10,75 or 15,75 cm. The carriers are available in 60% (8,0 cm), 80% (6,0 cm) and 100 % (5,4 cm) width. The snaptool can be used to add snaps to the tape wherever required, for increased stability to the curtain when fixing it on an overlap arm or return pulley. The base of the first master carrier can be fixed onto the master carrier, to make sure the master carrier takes the curtain along with it.

Unless indicated otherwise, all other regular track components can be used for the Forest Easyfold System

EXPERIENCE AND QUALITY

The introduction of the world's first clickable curtain track system KS® Klick System and the Smart Klick® technology was the starting point for Forest Group to become one of the world's most reputable manufacturers of high end window treatment solutions. Over 25 years later Forest Group curtain track systems still represent the industry's standard due to ongoing innovation and constant focus on the highest quality.

WARRANTY

Whether sophisticated electric curtain systems, decorative channel rod systems or plain tracks, the combination of high end materials and precise manufacturing make it possible for Forest Group to provide a 10 year warranty.
